

Availability and performance statistics

On this page you can find the statistics of the API's availability and performance on a quarterly basis. The service availability is calculated as uptime (100%) minus the downtime percentage (%). The performance is shown in milliseconds (ms) and is the time it takes for the bank to respond to a specific request made by a third party.

Service availability

The table below contains the monthly availability and the monthly success of all PSD2 API's combined.

Period	PSD2 API's		
	Uptime (%)	Downtime (%)	Error Rate (5xx)
1-31 October 2022	98,38	1,62	39
1-30 November 2022	99,99	0,01	28
1-31 December 2022	99,99	0,01	14

If service availability was 100%, a limited number of requests was made in the period.

Performance

The table below contains the monthly average performance in milliseconds.

Period	PSD2 API's	
	AIS response time (ms)	PIS response time (ms)
1-31 October 2022	1 262	2 544
1-30 November 2022	1 254	1 336
1-31 December 2022	1 257	1 471

If response times were 0 milliseconds, a limited number of requests was made in the period.

Availability and performance statistics

On this page you can find the statistics of the API's availability and performance on a quarterly basis. The service availability is calculated as uptime (100%) minus the downtime percentage (%). The performance is shown in milliseconds (ms) and is the time it takes for the bank to respond to a specific request made by a third party.

Service availability

The table below contains the monthly availability and the monthly success of all PSD2 API's combined.

PSD2 API's			
Period	Uptime (%)	Downtime (%)	Error Rate (5xx)
1-31 October 2022	100	0	0
1-30 November 2022	100	0	0
1-31 December 2022	100	0	0

If service availability was 100%, a limited number of requests was made in the period.

Performance

The table below contains the monthly average performance in milliseconds.

PSD2 API's		
Period	AIS response time (ms)	PIS response time (ms)
1-31 October 2022	0	0
1-30 November 2022	0	0
1-31 December 2022	0	0

If response times were 0 milliseconds, a limited number of requests was made in the period.

Availability and performance statistics

The performance is shown in milliseconds (ms) and is the time it takes for the bank to respond to a specific request made by a third party.

Service availability

The table below contains the monthly availability and the monthly success of all PSD2 API's combined.

Period	PSD2 API's		
	Uptime (%)	Downtime (%)	Error Rate (5xx)
1-31 October 2022	99,78	0,22	23
1-30 November 2022	99,72	0,28	66
1-31 December 2022	99,61	0,39	128

If service availability was 100%, a limited number of requests was made in the period.

Performance

The table below contains the monthly average performance in milliseconds.

Period	PSD2 API's	
	AIS response time (ms)	PIS response time (ms)
1-31 October 2022	1 590	0
1-30 November 2022	1 602	0
1-31 December 2022	1 676	0

If response times were 0 milliseconds, a limited number of requests was made in the period.
